

MADE IN THE USA

BENCHTOP MANIFOLDS

Test Multiple Pressure Instruments at Once

TOSS THE TOOL AND TAPE

The Benchtop Manifold makes it easy to run pressure tests on gauges, transmitters, or transducers with fast, simple connections that eliminate the hassle of using a wrench and thread tape.

Fast, Convenient Testing

Save time by calibrating multiple pressure devices simultaneously.

Adapt to Any Situation

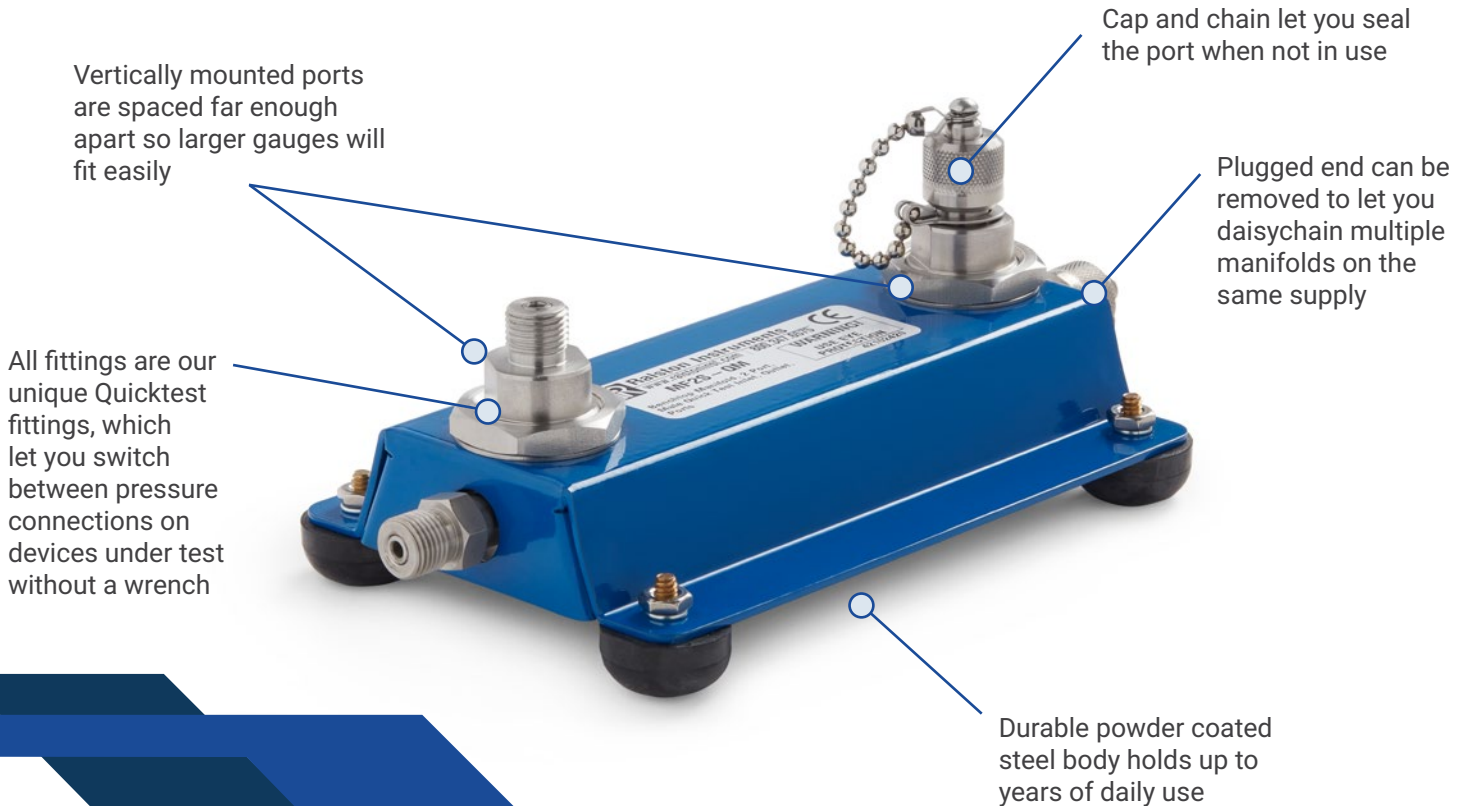

Test multiple pressure gauges or transmitters with different process connections and sizes in seconds.

Connect to Any Device Under Test

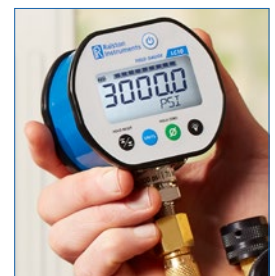

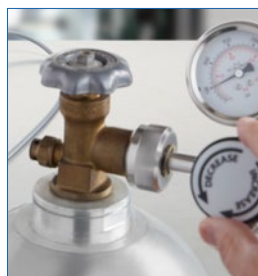

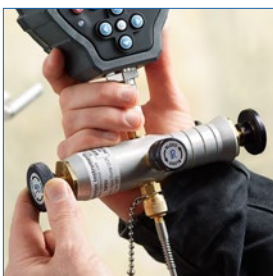

Easily switch between pressure connections on DUTs without the hassle of using a wrench and thread tape.

SIMPLE, STRAIGHTFORWARD DESIGN

Countless Connection Options

Quickly and easily connect any pressure supply with any DUT for fast, convenient pressure testing.

BENCHTOP MANIFOLD SPECIFICATIONS

Model	MF2S-QM	MF2S-XF-XM-PL	MF4S-QM	MF4S-XF-XM-PL
# of Ports	2	2	4	4
Max Pressure	5000 PSI / 350 bar / 35 MPa	10000 PSI / 700 bar / 70 MPa	5000 PSI / 350 bar / 35 MPa	10000 PSI / 700 bar / 70 MPa
Materials	Powder Coated Steel Stainless Steel	Powder Coated Steel Stainless Steel	Powder Coated Steel Stainless Steel	Powder Coated Steel Stainless Steel
Inlet Port	Male Quick-test	Male Quick-test XT	Male Quick-test	Male Quick-test XT
Test Ports	Male Quick-test	Female Quick-test XT	Male Quick-test	Female Quick-test XT

Find out more about the Ralston Benchtop Manifold here:

Ralston Instruments provides complete pressure calibration solutions for a wide range of applications, saving time and taking the guesswork out of critical pressure testing, maintenance and repair operations.
